

# Why Choose A **Bottle-less** Water System over Bottled Water?

## It's More Convenient!

- Never run out of water again
- Automatic electronic invoicing
- Quiet and unobtrusive system
- Eliminate disruptive water deliveries
- Remove the need for bottle storage space

## It's Safer!

- Avoid potential spillage while pouring jugs into open reservoirs
- Reduce risk of injury caused by lifting and carrying heavy water jugs

## It's Healthier!

- Reduce potential illness by eliminating dangerous contaminants using a 5-point filtration process:
  - Dirt, rust, and silt
  - Chemicals, solvents, and chlorine
  - Lead, mercury, and arsenic
  - Bacteria, parasites, and viruses

## It's Cost Effective!

- Fixed cost billing - no matter how much is consumed
- Price protection policy for up to 60 months

*"Since making the change from bottled water to your system, we have reduced water costs by an average of 50% per month and have ended the constant battle with replacing new water jugs!"*
